

LOGESHWARAN B

Mechanical engineer

2k23me050@kiot.ac.in | +91 7812832583 Salem, Tamil Nadu, | India <https://www.linkedin.com/in/logeshwaran-b-8207522a6>

EDUCATION

B.E Mechanical Engineering	2023 – Present
Knowledge Institute of technology, Salem	CGPA – 8.1/10
12 th Class	2022 - 2023
Government Boys Higher Secondary School, Idappadi Salem	Percentage – 74.3%
10 th Class	2020 – 2021
Government Boys Higher Secondary School, Idappadi Salem	All pass

EXPERIENCE

Intern

CFD Summer intern/SRMIST Chennai	01 jun 26 - 30 jun 26
- Trained in CFD applications using ANSYS Fluent and Workbench. - Learned geometry modeling, meshing, simulation setup, and post-processing. - Performed flow and heat transfer analysis using industry-standard CFD tools.	
Anaamalai Toyota showroom, Mallur, Salem	07 jan 25 - 13 jan 25
- I gained valuable insights into the automotive sales and customer service industry. - Learned about Toyota's vehicle lineup, features, and sales documentation process. - Improved communication skills through interaction with clients and the sales team.	

PROJECTS

Surface Roughness Effects on NACA 4412 Airfoil using CFD

- Conducted CFD analysis of a NACA 4412 airfoil using ANSYS Fluent.
- Investigated the effects of sandpaper, hump, and zig-zag roughness at different angles of attack.
- Evaluated lift, drag, pressure distribution, and flow behavior to assess aerodynamic performance.

Paper Shredder Hackathon

- Designed and developed an IoT-enabled smart paper shredder prototype.
- Integrated sensors and IoT tools to improve functionality and connectivity.
- Utilized recycled materials to create a sustainable and cost-effective solution.

Smart Waste Segregation System

- Developed an automated waste segregation system using Arduino Nano and sensor-based technology.
- Classified waste into wet, dry, and metal categories using ultrasonic, moisture, and inductive sensors.
- Implemented a servo-controlled mechanism to automatically direct waste into the appropriate bin.

Passive Cooling for Homes

- Designed an eco-friendly cooling system using natural ventilation techniques
- Reduced indoor temperature without using electrical energy
- Focused on sustainable and energy-efficient solutions.

TECHNICAL SKILLS

- ANSYS Fluent (CFD)
- NX CAD
- Python
- Meshing and Post-Processing

ACHIEVEMENTS

SAE INDIA Southern Section – 2nd Edition CFD Competition 2026	07 jun 26
- Secured 3rd Prize and won a ₹5000 Cash Award. - Applied ANSYS Fluent for CFD simulation and analysis.	

E-Kart National Level Event

- Participated in Design Domain
- Secured Overall Runner-Up Position
- Gained experience in vehicle design and teamwork

CERTIFICATIONS

- SAE INDIA Southern Section – 2nd Edition CFD Competition 2026 – 3rd Place Winner Certificate.
- Paper Shredder Hackathon Participation Certificate.
